

Class Concept:

This is supervisory and professional level work in the supervision, training and review of work of lower level analysts responsible for the review, evaluation and approval of rate, rule and policy form filings by Insurance companies; or, analysis of premium and loss statistics for all types of insurance; or, the retrospective review and evaluation of the business practices of all types of insurance companies; or, examination of insurance industry agencies and related businesses for the purpose of ensuring compliance with statutes and rules; or, research of complex and detailed issues pertaining to laws and regulations, company operations and insurance theory.

Positions supervised often include policy rate analysts (approval of forms, policies, rates, etc.) or market examiner (on-site examination of company's marketing and advertising, claims payment, underwriting, and rating practices). These analysts normally specialize in either property and casualty or life and health insurance. Positions supervised may also research complex and detailed issues pertaining to laws and regulations, company operations and insurance theory (analyzing data, drafting reports, identifying industry practices and regulatory practices of other states to support management in assessing the regulatory needs of North Carolina.

Positions supervise lower level analyst and office support personnel, assigning and supervising their work and appraising their performance.
