Temporary Solutions has collaborated with the Office of State Controller (OSC) to provide agencies with access to Temporary Solutions organizational units in the Integrated HR-Payroll System (IHRPS). This is useful for agencies that want to provide more direct support to their temporaries employed through Temporary Solutions by accessing their time, pay, employment information, and more.

How to request access to TS Organizational Unit in Beacon?

- If you do not have access to TS org units in BEACON, one of your agency's Agency Data Owners can submit a ticket to BEST Shared Services asking that they grant you that permission.
- The Agency Data Owner will need to let OSC know what TS org units you need access to. A list of TS org units for DHHS is on our website: https://oshr.nc.gov/temporary-solutions-org-units/open. Once BEST has processed the request, you will be able to access your org. unit information through BEACON/Fiori.
- Data Owners are appointed by their agency and are responsible for approving changes or additions to position/user mappings. They are the points of contact for approving changes for access.
- Link to Data Owner Manual.
